

A photograph of an industrial machine, possibly a large fan or blower, enclosed within a SATECH perimeter guarding system. The guarding consists of a black metal frame with yellow vertical posts and a black wire mesh. The machine is visible through the mesh. The background shows a factory setting with various pipes and equipment.

GENERAL CATALOG

Perimeter Guarding Modular Systems

SAFETY STANDARDS

Fully compliant with International
Machine Safeguarding requirements

EN ISO 14120 / ANSI-RIA R15.06 / JIS B 9716

SATECH
Modular Machine Guards

Working environment **safety?** An important matter.

EU and international directives establish the obligation to protect machinery with fences complying with specific construction and safety distance requirements. **Without these Guards, it is not possible for machinery to operate.**

For example, perimeter Guarding must:

Be designed and built so as to prevent climbing (EN ISO 14120-5.18)

Ensure adequate viewing of production processes (EN ISO 14120-5.2.4)

Be equipped with retained fasteners when disassembled (EN ISO 14120-5.19)

Be placed at a specific distance from the danger zone (EN ISO 13857)

EN ISO 14120

General requirements for the design and construction of fixed and movable Guards - excerpts

5.2.5.3 - Operating force

Movable Guards or removable sections of Guards shall be designed to permit ease of operation. The observance of ergonomic principles (...) contributes to increasing safety by reducing stress and physical effort of the operator.

5.3.9 - Removal

Demountable fixed parts of Guards shall only be removable with the use of a tool. Fixed Guards shall be designed to prevent easy removal.

5.4.2 - Impact

Guards shall, as far as practicable, be designed and the material selected to withstand and contain reasonably foreseeable impacts and ejections.

5.23 - Appearance

Guards shall be designed so that they do not add adverse physiological and psychological effects.

5.16 - Noise reduction

Where necessary, materials shall be selected to provide noise and vibration reduction and (...) minimize effects of resonance which can transmit or amplify noise.

5.4.3 - Rigidity

(...) Guard frames (...) and infill materials shall be selected and arranged to provide a rigid and stable structure and to resist deformation.

5.9 - Machine viewing

Where viewing of machine operation is required through the Guard, materials shall be selected with suitable properties. If (...) wire mesh is used, this should be of adequate open area and suitable colour to permit viewing. Viewing will be enhanced if the perforate material is darker than the area observed.

The Modular Machine Guarding Solution **tailored to your need.**

Research, development, design, manufacturing, logistics and customer service: since 2000, Satech has been the **reference for industrial workplace safety.**

EN ISO 14120 compliant Machine Guards Systems

Satech is the first Italian manufacturer of Modular Machine Guards Systems. A **modern international company** today, in its 20+ years of work it has contributed to the **safety** of thousands of automated machinery systems for the protection of millions of people worldwide.

GLOBAL DISTRIBUTION AND OFFER AVAILABILITY:

Satech Solutions are distributed in over 40 Countries worldwide, locally.

Systems composition, product availability and technical specifications might vary depending on your geographic area of interest.

Your local Satech Representative is available to help you choose and to provide you with the latest information.

ORDER PREPARATION TIMES:

The stated "minimum order preparation times" may vary depending on the time of year, workloads, stock availability and/or local market conditions. They can be confirmed accurately only after the Order Confirmation.

IMAGES AND TECHNICAL DATA:

Images and technical specifications in this catalog are for illustrative purposes only and are current at the time of publication. Satech's policy is one of continuous improvement, so products distributed may undergo changes or updates.

©Satech: the contents of this catalog are protected by copyright and, therefore, may not be reproduced for commercial purposes without explicit permission from Satech.

Satech, your ideal partner for Industrial Safety

We are the first Italian Company that's specialized in the manufacturing of Standard-compliant Modular Machine Guard Systems. Since 2000, we have been designing Industrial Safety Solutions with high-quality products that are modular and easy to assemble.

Tailor-made Solutions

Your need, our Solution

Each machinery layout features specific requirements. Our modular, stock-ready Guards - both fixed and movable - provide the perfect Solution to most of customer needs in all industrial sectors. Our Quotations Team will best advise you on how to optimize our modules to get the right fit for your needs.

OPTIMIZATION
OF COMPONENTS

Technology

Automation

Our robots and machinery 4.0 are controlled by state-of-the-art software to ensure the perfect integration and control of any process: from laser cutting to panel welding, from painting to packing and shipping.

INTEGRATED MANAGEMENT
OF ALL PROCESSES

4**Direct offices**
Between Europe and Japan

5**Standard Systems**
stock-ready

20**K****Square meters**
of production area

ISO 9001 System

Satech considers Quality as an integral part of its Value proposition. The ISO 9001 certified Quality system ensures the highest degree of efficiency in all our processes.

Craftsmanship

Details that make the difference

Customizations of our products are carried out by the CustomGuard team, which takes care of every detail with craftsmanslike attention. Additionally, we are able to develop and deliver **turnkey projects** by integrating our Standard Solutions with tailor-made Products.

Environmental Impact

Our commitment to sustainability

We strive to reduce the impact on the Planet through an ISO 14001 certified environmental management system. Our activities undergo continuous analysis with the purpose of improving the Company's sustainability.

Self-production of clean energy

Energy consumption is a topic to which we devote considerable attention. A portion of our Smart Factory's energy requirements is generated by a **photovoltaic panel system** installed across **6,000 square meters** of roofing at our Production Facility in Bulciago. The remaining electrical energy needed is supplied by partners who guarantee its **origin from renewable sources**.

Use of recycled raw material

The consumption of natural resources is one of the factors that has the greatest impact on sustainability. More than 70% of the **steel** we use comes from **recycled raw material**. Our Solutions are designed for longevity: the Technical Cycle of our Products enables their **recycling at the end of their lifespan**.

**240 MW OF ELECTRIC
ENERGY PRODUCED
EACH YEAR**

**OUR GOAL:
100% CIRCULAR
ECONOMY**

Concrete Actions
to protect the Environment

Centralized Air Conditioning

In addition to independently producing a portion of our electrical energy, we maximize efforts to limit its consumption. A heat pump system enables climate control in our offices, eliminating the use of fossil fuels.

Timed lighting system

The lighting system installed in our Headquarters is energy-efficient. A timer system restricts the use of artificial lighting to only the necessary hours.

Water management

Water is the most important resource for our planet. Our painting process, for example, includes a system for reusing wash water, which reduces the amount of wastewater and water resource consumption.

EcoVadis

We have chosen to rely on **EcoVadis** for an objective assessment of our sustainability practices. This forms an integral part of the continuous improvement process that guides our daily operations.

Certifications

ISO 14001 environmental management

Through the development and maintenance of an **ISO 14001 certified environmental management system**, we commit to prevent water, air, and soil pollution by minimizing waste generation and by limiting the consumption of natural resources.

AutoCAD® and Inventor Design Solutions tailor-made for you

Our Quotations Department specializes in developing industry-dedicated solutions as well as design proposals for different sectors. Satech projects are saved and delivered as DWG format or 3D format (STP) upon request, ensuring full compatibility with all IT standards.

Optimization of Modular Components

Thanks to our customized AutoCAD® application, we are able to **optimize the choice of modular components** that will be part of your layout.

3D Visualization Preview

To get a concrete idea of what your Perimeter Guard will look like, you will be provided with files in DWG and STP formats, fully compatible with all design software.

OPTIMIZATION OF COSTS

COMPATIBILITY
WITH ALL SOFTWARE

3 Ways

you can get a free,
no-obligation quote

1

Send us a draft of your layout

Our Quotations Department will
take care of the technical drawing,
optimizing the number of modules.

2

Request 3D models of our Products

Import the models of our Guards
directly into your technical drawing and
send it to us to get your quotation.

*You can request the 3D models from your
reference person or download them from
the Satech page on Traceparts.*

3

Use our free software

Draw your Perimeter Guard with our
Disegna software, export the list of
components directly and send it to us
for quotation.

Disegna 5.0

your perimeter in 3 easy steps

Disegna is the free design software **for our customers and distributors** that makes it easy to ask for a quote.

The simple and intuitive interface is based on the same software used by our Quotations Department and features the full database of Satech Products. **You can design starting from a blank page or by importing your existing layout** in a standard format (DWG, PDF, etc...). You will get the list of the modules for your quotation **in just 3 steps!**

Request it now! disegna@satech.it

Safety distances of Machine Guards

Reaching over protective structures

EN ISO 13857, 4.2.2

- A** Height of hazard zone
- B** Height of protective structure
- C** Safety distance

Table 2

dimensions in mm

B	1000	1200	1400	1600	1800	2000	2200	2400	2500	2700
A	Horizontal distance to hazard zone C									
2700	-	-	-	-	-	-	-	-	-	-
2600	900	800	700	600	600	500	400	300	100	-

0	1100	500	-	-	-	-	-	-	-	-

Reaching through regular openings

EN ISO 13857, 4.2.4.1

The dimension of the opening "e" corresponds to the side of a square opening, the diameter of a round opening and the narrowest dimension of a slot opening.

For openings larger than 120 mm, safety distances in accordance with point 4.2.2 shall be used.

NOTE (1):

If the length of the slot opening is ≤ 65 mm, the thumb acts as a stop and the safety distance for protective structures can be reduced to **200 mm**, resulting in **great space saving**.

Table 4

dimensions in mm

Part of body	Illustration	Opening	Safety distance S_r		
			Slot	Square	Round
Fingertip		$e \leq 4$	≥ 2	≥ 2	≥ 2
		$4 < e \leq 6$	≥ 10	≥ 5	≥ 5
Finger up to knuckle joint		$6 < e \leq 8$	≥ 20	≥ 15	≥ 5
		$8 < e \leq 10$	≥ 80	≥ 25	≥ 20
Hand		$10 < e \leq 12$	≥ 100	≥ 80	≥ 80
		$12 < e \leq 20$	≥ 120	≥ 120	≥ 120
		$20 < e \leq 30$	≥ 850 (1)	≥ 120	≥ 120
Arm up to junction with shoulder		$30 < e \leq 40$	≥ 850	≥ 200	≥ 120
		$40 < e \leq 120$	≥ 850	≥ 850	≥ 850

Safety distances to prevent access by lower limbs

EN ISO 13857, 4.3

When it is not possible to foresee upper limb access through the opening, it is possible to use the values given in this Table to determine safety distances for the lower limbs.

“e” refers to the same types of opening as in chapter 4.2.4.1.

NOTE (1):

If the narrower slot width is $\leq 75\text{ mm}$, distance can be reduced to $\geq 50\text{ mm}$.

NOTE (2):

Slot openings with $e > 180\text{ mm}$ as well as square or round openings with $e > 240\text{ mm}$ allow access with the whole body.

Table 7

dimensions in mm

Part of lower limb	Illustration	Opening	Safety distance Sr Slot Square or round	
Toe tip		$e \leq 5$	0	0
		$5 < e \leq 15$	≥ 10	0
Toe		$15 < e \leq 35$	≥ 80 (1)	≥ 25
Foot		$35 < e \leq 60$	≥ 180	≥ 80
	$60 < e \leq 80$	≥ 650	≥ 180	
Leg (toe tip to knee)		$80 < e \leq 95$	≥ 1100	≥ 650
		Leg (toe tip to crotch)	$95 < e \leq 180$	≥ 1100
$180 < e \leq 240$	not admissible (2)		≥ 1100	

EN ISO 14120

Impact Test

In our dedicated **Test Center** Satech Solutions are subjected to severe **dynamic resistance tests from the inside outwards** according to the procedure contained in the EN ISO 14120 Standard (Hard body / Pendulum Test).

Mass release height from the ground
(mass load center): $h_0 = 3,145\text{ m}$
Mass impact height from the ground
(mass load center): $h_1 = 1,515\text{ m}$
 $\Delta H = h_0 - h_1 = 3,145 - 1,515 = 1,630\text{ m}$

Framed panels

Safe, practical, resistant

Satech framed modular mesh panels are designed according to EN ISO 14120 and meet Risk Assessment safety requirements. Available with 20 or 30 mm frame, they can be assembled with 3 different assembly options.

Easy to handle

Robust and light

With a structure that's **lightweight** yet robust, the Satech framed panel can be easily handled by just one person.

Ready to use

Plug and play versatility

The frame comes **pre-drilled** to allow assembly with Nuts and Bolts and the installation of brackets, locks and accessories.

7 standard widths, infinite possibilities

The combination of our **7 standard panels** joined together allows to create all the intermediate widths in **100 mm increments**.

7 standard widths:

200	300	700	800
1000	1200	1500	

200

The Satech Modular Framed Panel

7 standard widths and 3 standard heights

DECLARATION OF
CONFORMITY
EN ISO 14120

Visibility

EN ISO 14120-5.9

The vertical mesh shape ensures excellent machinery visibility.

Anti-climbing

EN ISO 14120-5.18

The horizontal wires welded on the inside prevent climbing.

Less distance, more space saved

The 17x97 mm mesh slot allows to install the Guard only **120 mm** from hazard (EN ISO 13857), reducing the **amount of space** occupied by the safety perimeter.

120 mm

Safe and resistant

20 or 30 mm frame?

The 20 or 30 mm **square section tubes** and 3 mm wire mesh make the Satech panel rigid and resistant, while **welds at wires intersection** prevent the risk of resonance.

Adaptable directly on-site

AdaptaGuard is a robust, easy-to-assemble Perimeter Guard that allows to adapt panel shapes and size directly on-site, thus saving **plenty of time** in the event of unforeseen circumstances.

Unmatched versatility

New "Mix & Match" Posts

With its new **"Mix & Match" Posts**, AdaptaGuard is now compatible with FullSteel sheet metal panels and with transparent sheet ones for full personalization. The new tiltable baseplates with **3 anchoring points** reduce installation time.

Ready for any application

AdaptaGuard's applications are unparalleled. Whether it's about making a cutout shape in the panel or a last-minute adjustment to its size, all you'll have to do is cut the mesh and the Guard will be ready for use, with **no additional work required**.

Ease of Assembly

Assembling AdaptaGuard is easy and intuitive. The new **high-strength nylon-fibreglass fastenings** allow to quickly position the mesh and to connect it to the post via **captive retained Nuts and Bolts**.

Why choose the AdaptaGuard Perimeter Protection?

The AdaptaGuard Perimeter Guard is designed and manufactured in compliance with **EN ISO 14120** and meets **Risk Assessment** safety requirements.

Cross-Modular Systems

Beyond modularity

With the **interchangeability** of components and **Mix&Match** Posts, Satech Systems become **cross-modular**. The most easy-to-use and flexible Solution to fit a Perimeter Protection layout to the **unique needs** of each facility. Another step forward in the **optimization** and **customization** of industrial workspaces, aimed at **simplifying installation** and reducing operational costs.

Interchangeability of components

Systems adaptable to every need

Mix&Match allows you to easily configure your workspace. For instance, you can add a single customizable frameless Panel to an end-of-line conveyor of an ImpactGuard perimeter, or you can add a FullSteel welding cell to a frameless AdaptaGuard installation.

Versatility for your Layout

Flexibility and Efficiency

Mix&Match adds further **versatility** to Satech Solutions: you can customize your layout with ready-to-use components **quickly** and **affordably**, without compromising the safety of your facilities.

Panels in other materials

The **cross-modularity** of **Mix&Match** extends to the compatibility with non-Mesh Panels, including **FullSteel**, **Transparent Sheet**, and **Mixed Materials**. A variety that enriches your customization possibilities even more.

Door in a box everything you need in a box

To reduce your efforts and **save you valuable time** we have packaged all the components needed to assemble our doors in "Door-in-a-box" kits, prepared by our Kit Department and carefully checked by the Satech Quality System.

Standard Doors

A complete and versatile range of openings

We provide a wide range of Standard Doors Solutions for your Safety Perimeter. 5 types of movement, openings from 700 to 12000 mm, 3 different posts sections and a variety of panel options. **Upon request, Satech doors can be supplied pre-assembled, ready for installation.**

Simple and functional

Customizable with several panel options

Simple, solid and durable, Satech doors are built with our modular components and are easy to assemble. They can be made with **any type of framed panel option** (full mesh, transparent sheet, mixed) or with FullSteel sheet metal panels.

16+ Standard Doors
Available in stock

Hinged, linear, vertical or hybrid?

The right door for your need

Our Standard doors - hinged, folding, with guides, linear, vertical or hybrid to optimize the opening width - are designed to enable machinery access to **people, goods, pallet trucks and various types of heavy loads**.

More than 150 Locking Solutions

Locking systems suitable for any Performance Level (PLr)

Each Satech door can be completed with a wide range of **locks**, from simple magnet locks to mechanical ones and interlocks, according to the **Required Performance Level (PLr)**. We also design and manufacture brackets for your own locks.

BodyGuard

Fall prevention guardrail

The Protection for walkways and elevated areas

TUBES
mm
40

Practical

BodyGuard is the fall prevention system for **elevated areas** or for delimiting ground walkways. It can be anchored to the **floor** with a baseplate or to the **walkway** with bolts.

Resistant

Its lightweight structure (horizontal beams plus a kick plate) makes BodyGuard a compact and durable solution for the safety of workplace operators.

WIDTHS (mm)	1000	1500

Colors

RAL COLORS	RAL 1021	CustomGuard Colors
COATING	Powder (for indoor use only)	

Great time saving

The reduced number of components and the self-centering brackets ensure quick assembly, **saving you valuable time.**

Safe and stable

Two anchoring options

Depending on the area that needs to be protected, BodyGuard can be anchored to the floor with **front bolts** or with **baseplates** bolted to the ground.

Ease of assembly

BodyGuard allows both **linear** and **angular** assembly with the same components. The self-centering brackets guide the horizontal beams in place, while Nuts and Bolts lock them to the uprights.

Versatile

In conjunction with the two assembly options, the modular beams-and-brackets design makes BodyGuard suitable to **delimit all types of walkways and elevated areas** - even when it comes to large surfaces.

Why choose BodyGuard?

AISI 304L Stainless Steel Solutions

BlueGuard Perimeter Protection

BlueGuard is the frameless Satech Solution for the Agro-food, Chemical and Pharmaceutical industries. Made of passivated **AISI 304L** Stainless Steel and food technopolymer, its open design allows for a high degree of sanitization.

Maximum Safety

Food material

To avoid any potential contamination, BlueGuard components are all made of high-quality, passivated **AISI 304L Stainless Steel** to prevent oxidation. Fastenings come with food contact approved **DOMAMID® 6G30FC** inserts.

Maximum Hygiene

Resistant to frequent washing

BlueGuard's open structure allows it to be fully washed. Each component is designed to withstand aggressive agents, ensuring long-term durability of this Guard.

Four widths, ideal for your layout

The **4 standard modular widths** of the BlueGuard panel are designed to fit any kind of layout. The frameless panel can be easily cut on-site to create all intermediate widths in **32 mm** increments.

4 standard widths:

484

996

1476

1988

Tested on 2000+ wash cycles

BlueGuard has been subjected to strict endurance tests for more than **2000 wash cycles** (6 years of use) with the following ECOLAB® detergents:

TOPAZ AC5

P3-TOPAX 990

TOPACTIVE DES

P3-TOPAX 66

POSTS AND PANELS	High quality passivated AISI 304L Stainless Steel
TECHNOPOLYMER	DOMAMID® 6G30FC for food

Durable and tested for high-pressure washing

BlueGuard is the Stainless Steel Perimeter Guard designed to **last long** and to withstand accidental impacts, aggressive environments and frequent high-pressure washing.

Safe, resistant and ergonomic 4 mm wire and reinforcement ribs

The frameless, **AISI 304L Stainless Steel** panel in **4 mm wire** is strengthened by **reinforcing ribs** to absorb any impact dynamically and make assembly easier to carry out.

A **single type of post** for linear and angular assembly - as well as for doors - **reduces preparation time**. The **lack of a frame** allows to **easily fit this Guard on-site** to layout needs.

DEVELOPED ACCORDING TO THE HIGHEST HYGIENIC STANDARDS

BlueGuard is developed according to the highest standards and hygienic design guidelines required by the regulations for the agro-food, chemical, and pharmaceutical sectors, including **EN 1672-2, EN ISO 14159, EHEDG Doc.8, and Doc.13**.

Doors and Accessories

BlueGuard hygienic fencing

Access to Stainless Steel perimeters is provided by hinged and sliding doors, with single or double opening. Doors and accessories of BlueGuard Perimeter Guards are designed and manufactured in strict accordance with Hygienic Design guidelines.

Accessories

1 Variable angle

BlueGuard's universal post allows linear (180°) and angular (90°) panel assembly. The variable angle kit is an easy-to-use accessory that allows to join panels at an angle between 20° and 70°.

2 Post support struts

The post support strut helps reinforcing posts subjected to significant horizontal dynamic loads as well as those placed in critical layout positions. Available for ground fixing as well as for anchoring to machinery with telescopic distance adjustment.

3 Safety Switch Brackets

Stainless Steel brackets to support Safety Switches. Models compatible with products from leading manufacturers as well as designed upon request.

4 Tilting baseplate

The new single-anchor point tilting baseplate compensates for any floor slope and allows a tilting of the post up to 10°.

Locking Systems

Safe Access at any Level

Satech doors can be completed by over **150 models of locks** with different mechanisms, so as to reach the **Performance Level required (PLr)** for control systems.

GET TO KNOW MORE

Which lock is right for you?

Control Systems and Performance Level Required

The **EN ISO 13849-1 Standard** defines the requirements to design and construct **control systems and their parts for the safety of machinery**. Among these, **locks installed on the Guards** are part of control systems.

Determining the safety functions performed by control systems is an important step for risk reduction. Each safety function is associated to a **Required Performance Level (PLr)**, i.e. the Performance Level to be reached in order to achieve the required

150+ Locking Solutions available

risk reduction for each safety function. Performance Levels are determined by the following: **severity of injury, frequency and/or exposure to a hazard** and the **possibility of avoiding hazard or limiting harm**.

The greater the amount of risk reduction required, the higher the PLr must be. It is for this reason that **different locks fulfill different safety needs**.

REQUIRED PERFORMANCE LEVEL (PLr)	A	B	C	D	E
----------------------------------	---	---	---	---	---

Low risk

High Risk

IMPORTANT

Risk assessment as well as the determination of safety functions and performance levels are the sole responsibility of the customer. Satech is limited to the sale of products and assumes no responsibility if the locking system purchased covers a Performance Level that is not appropriate for the corresponding control system.

Proper risk assessment conducted by experienced and qualified professionals will tell you which locking system is the right choice for you.

Galvanizing and SISTEMA TRIPLEX®

Our Guards can be completed with **hot-dip galvanizing**, a process that extends their life by protecting the steel from corrosion and weathering. To ensure even greater durability, our SISTEMA TRIPLEX® completes the **rustproofing** provided by hot-dip galvanizing with a **powder coating surface finish**.

Modular Machine Guards that fit your needs.

Tailor-made Solutions for the safety of operators and machinery

Protecting workers and machinery is paramount to create a safe and productive work environment. Satech Modular Machine Guards Systems, Doors and Accessories provide tailor-made Solutions for any machinery layout need.

3 framed Systems, 2 frameless Systems, doors, accessories and a wide range of locking systems ensure the maximum level of protection when accessing hazard areas for inspection or machinery maintenance.

Perimeter Protection Machine Safety Guards compliant with European and International Standards

Satech Machine Guards are manufactured in compliance with the **EN ISO 14120 Standard**, "General requirements for the design and construction of fixed and movable Guards". They can be installed at a minimum distance of **120 mm from hazard** (in accordance with EN ISO 13857), saving you valuable layout space.

All Satech products are manufactured with **quality materials** and are highly durable. Mesh panels can be easily connected to posts with quick assembly systems (equipped with captive retained fastenings, in accordance with 2006/42/CE - Machinery Directive), which allows you to **greatly reduce assembly time**.

Satech is the first Italian manufacturer of Modular Machine Guards. A **modern international company** today, in its 20+ years of work it has contributed to the safety of thousands of automated machinery systems and the protection of millions of people worldwide.
